

Amendments to the Specification:

Please replace the paragraph beginning at page 3, line 9, with the following amended paragraph:

--In recent years, the sizes of the overhangs of automobiles ~~becomes~~ have become smaller, and so there have been an increasing number of ~~such~~ automobiles in ~~each~~ of which a wheel house is disposed just at the rear side of a head lamp. In such automobiles, the increase of the depth of a head lamp influences ~~[[on]]~~ the design ~~of automobiles~~.--

Please replace the paragraph beginning at page 3, line 15, with the following amended paragraph:

--Further, ~~such a~~ using a structure having a ~~that the~~ leveling device ~~being~~ such as a precision device that protrudes in the backward direction of the lamp body ~~causes a~~ increases the risk that the leveling device ~~is made~~ will collide with an outside member during a carrying procedure or an attachment procedure to a vehicle body. ~~and so the~~ The leveling device may be damaged by the collision.--

Please replace the paragraph beginning at page 5, line 15, with the following amended paragraph:

--As understood from Fig. 1, Fig. 2 and Fig. 3, a head lamp for an automobile 10 is arranged in a manner that the front opening of a lamp body 20 having a concave portion opened toward the forward direction is covered by a transparent front cover 30 thereby to form a lamp chamber 40, and a reflector 60 which holds a ~~valve~~ bulb 50 so as to be detachable freely is disposed so as to tilt freely within the lamp chamber 40.--
